

Patch Management Policy

Document ID: POL-PATCH-003

Effective Date: February 10, 2025

1. Objective To ensure all systems remain updated to prevent exploitation of known software vulnerabilities.

2. Scope This covers all Windows-based servers and employee laptops.

3. Patching Schedule

- **Standard Updates:** The IT department will deploy operating system patches on the last Friday of every month.
- **Testing:** IT staff will install patches on a designated test machine before rolling them out to the wider company network.
- **Third-Party Software:** Users are responsible for clicking "update" when prompted by applications like web browsers or PDF readers.
